  - The multi-monitor installation by Andrej Zdravic, presented at EXPO'98 - Pavilion of Slovenia, is one of the most successful creations of all exhibition. We are caught by the infinite beauty and simplicity of the images, through the interiorization of the sound it takes you to the very essence of the element of water, to the very life of water in relation to what surrounds it. It's a unique moment of communication with the water and it frames within the spirit of the World Exhibition, what unfortunately few others managed to do. - Dr. Pedro Veiguiha (23.9.98)
